Yevheniia Simaka

Frontend/Fullstack Engineer | Salt Lake City, UT | U. S. Citizen
yevheniiasimaka@gmail.com | 657-627-4138

SUMMARY OF QUALIFICATIONS

Frontend Developer with experience building **fast**, scalable, and user-focused **web applications** using React, Next.js, TypeScript, and Tailwind CSS. Skilled in creating **responsive interfaces**, integrating REST APIs, managing global state, and implementing secure authentication flows with tools like Vercel, GitHub, and MongoDB. Adept at **collaborating** in teams, **optimizing performance**, and ensuring **accessibility and maintainability** through modern best practices.

Won **10+ international hackathons**, standing out among **hundreds of professional teams** for my ability to design and deliver impactful, human-centric projects under extreme time constraints. Hackathon experience honed the ability to work **fast** without sacrificing **code quality**, think creatively under pressure, and architect clean, **production-ready solutions** at speed. Recognized for shipping **impactful** features while maintaining technical **excellence** and **user-first design**.

PROFESSIONAL EXPERIENCE

REFERRED.FYI   New York, NYC
Design and Development Internship   July 2025 – Aug 2025

- Designed and refined intentional web experiences with a focus on **clarity, usability** and **clean design practices** using **Figma**.
- Worked on converting **Figma** designs into full **Next.js** pages and components. While improving user experience and simplifying workflows.
- Collaborated across **design** and **development** workflows by iterating on feedback, **maintaining** component libraries, to deliver scalable, maintainable **front-end solutions.**
- Streamlined complex operations into **optimised**, **intuitive workflows** for increased **efficiency.**

CONSTELLATION TECHNOLOGIES   New York, NYC
Full Stack Engineer Internship   Apr 2024 – Oct 2024

- Built and delivered high-quality frontend features for a production-scale web platform using **React**, **TypeScript**, **Tailwind** and **MUI**, contributing to a product serving thousands of active users daily.
- Developed responsive, accessible, and **scalable UI** components with a strong focus on performance, **design consistency**, and **usability**, closely following the company's **design system** and engineering standards.
- Collaborated with backend engineers to integrate **RESTful APIs** and handled complex data fetching, state management, and error handling, ensuring smooth and reliable user experiences.
- Worked with **Prisma** and **MongoDB** on the frontend side to manage and display **dynamic data**, ensuring accurate **CRUD** operations and data integrity across different user flows.
- Proactively **troubleshooted**, **debugged**, and optimized frontend issues using browser dev tools, network analyzers, and **performance monitoring**, contributing to **better stability**, **load speed**, and overall **UX**.

TECHNICAL PROFICIENCIES

• **Frontend Development:** HTML, CSS, JavaScript, TypeScript, React, Next.js (NextAuth.js, Server Actions, API Routes), Express, Node.js, Tailwind CSS, Sass, ShadCN, MUI (Material UI), Framer Motion, jQuery, Zustand, Axios, React Hooks, Form Handling, Responsive Web Design, Mobile-First Design, Authentication (OAuth 2.0, JWT, Clerk)
• **Backend & Databases:** Next.js API Routes, Server Actions, MongoDB, Prisma, Firebase, REST APIs, Axios
• **Design & UI/UX & Tools:** Figma, UI/UX Design, Component Libraries (Tailwind CSS, ShadCN, MUI), Framer Motion (animations), Responsive Web Design, Mobile-First Design, Git, GitHub, Vercel, Postman
